MURLI KUMAR

Backend Developer

+91-8452916764 | murlikumar07@gmail.com | aimgodheretest | murli-kumar

Summary

Backend Developer with hands-on experience building scalable **RESTful APIs** and server-side applications using **Node.js**, **Express.js**, **JavaScript (ES6+)**, and **TypeScript**. Proficient in **database design** and management with **MongoDB**, **MySQL**, **Mongoose**, and **Sequelize ORM**. Experienced in implementing secure **JWT authentication**, real-time communication with **Socket.IO (WebSockets)**, file upload handling, **payment gateway integration (Cashfree)**, and **AI API integration (Gemini API)**. Skilled in **cloud deployment** and writing clean, maintainable code with a focus on **API design**, performance, and **system architecture**.

Technical Skills

Languages: JavaScript (ES6+), TypeScript, SQL

Backend: Node.js, Express.js, RESTful APIs, JWT Authentication, Socket.IO (WebSockets), Middleware, Multer (File Uploads), API Integration

Databases: MongoDB, MySQL, Mongoose ODM, Sequelize ORM, Database Design, Schema Modeling

Tools and Technologies: Git, GitHub, Postman, Cashfree Payment Gateway, Gemini API

Cloud and Deployment: Render, Cloud-Hosted Databases

Education

DR. D. Y. PATIL INSTITUTE OF ENGINEERING & TECHNOLOGY, PUNE 2022

Bachelor of Engineering (Computer Science Engineering) **CGPA: 8.18**

Projects

Expense Tracker Live | GitHub

- Developed secure REST APIs for expense management with complete CRUD operations
- Implemented JWT authentication and bcrypt password hashing
- Integrated Cashfree payment gateway for premium membership
- Added AI-powered expense categorization using Gemini API
- Generated monthly reports and leaderboard, and optimized database queries using Sequelize
- Tech stack: **Node.js, Express.js, MongoDB, Mongoose, JWT, Cashfree**

Group Chat Application Live | GitHub

- Built a real-time messaging application using Socket.IO
- Implemented JWT-based authentication and user authorization
- Stored chat history in MySQL with efficient database relationships
- Enabled live messaging with scalable backend architecture
- Tech stack: **Node.js, Express.js, Socket.IO, MySQL, JWT**

Job Application Tracker Live | GitHub

- Designed RESTful APIs for managing job applications and interview tracking
- Implemented secure authentication and authorization using JWT
- Built modules for Applications, Companies, Dashboard, Saved Jobs, and Reminders
- Integrated Resume Upload and Profile Image Upload using Multer
- Deployed backend on Render with cloud-hosted database
- Tech stack: **Node.js, Express.js, MySQL, Sequelize, React, JWT, Multer**
